

# Permashield Folding Arm Awnings

Why should I choose the  
Permashield Folding Arm Awning

**Permashield's Folding Arm Awnings offer excellent protection against sun, wind and rain. These high quality awnings can be adapted to any size required, and are virtually unlimited in the width that they can span.**

## • Applications

Excellent for homes, cafes, retail stores and any spaces requiring protection from the elements.

## • Size

These awnings can be adapted to any size required, and are virtually unlimited in the width that they can span. The outward projection available ranges from 1.5m to 3.25m, but this is dependent upon the width of the awning. Folding arms are made from heavy gauge powdercoated extruded aluminium with brass bushes, an internal spring system, and marine-grade stainless steel nuts and bolts.

## • Operation

Available for manual ( with manual gear box and crank handle) or motorised operation. Crank Handles range from 1.5m to 2.5m and are available in a white finish. Motors can be standard or remote controlled. Further automatic sensor-controls for wind, sun or rain can be installed.

## • Colours

A wide range of fabric colours is available. The frame of the awning is available in white, beige and black or can be powdercoated to a special colour request at an extra cost.

## • Valance

The 200mm valance ( trim) can be straight or scalloped.

## • Pelmet Cover

An optional colourbond or aluminium pelmet cover is available to cover the awning roll and motor when in the closed position.

## • Fixing

Awnings can be face fixed to the wall, onto the fascia, or top fixed into virtually any surface. A variety of strong steel galvanised brackets may be used to achieve this:

Fascia Kit Brackets: 10 or 22 degrees

Rafter Fixing Brackets: 125 or 200mm

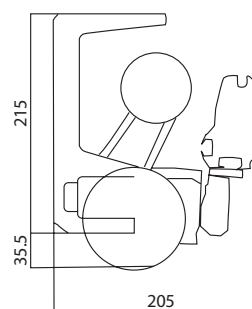

Standard Fixing Brackets: Made from cast aluminium and powdercoated to suit requirements.

Wall Mount Fixing Brackets: Made from cast aluminium and powdercoated to suit requirements.

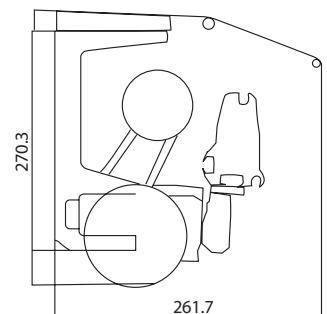

## • Axle

The axle is available in three different diameters depending on the width and projection required. These are 60mm,70mm and 78mm.

NO PELMET COVER

PELMET COVER

Permashield's Folding Arm Awnings offer excellent protection against sun, wind and rain. These high quality, economical awnings can be adapted to any size required. Excellent for homes, cafes, retail stores and any space requiring protection from the weather.

**Available for manual or motorised operation.**
